

Meeting Report (5/19/26)

Attendees:

Logan, Ryan, Tyler

Agenda Items Discussed:

Recap – Caught Tyler up on our last meeting notes and helped everyone get jumpstarted on milestone 2. Went over several brainstorming ideas to get a feel for the upcoming milestone.

Github – went over repository information and branching to help manage the project. Ryan went over the project management section. We are planning on using the issues section of github to manage tickets and project issues.

Milestone 2 - went over the general information for milestone 2.

- Set up a dictionary for memory. 00-99 for keys and value is what we put there.
- Parse the data and use it for an operator and memory value.
- Set up a way to read the test files.
- Accumulator should be a data structure that is ordered and that can be added to and data manipulated. (stack?)
